RE: Letter #5 - Possible Exposure to Youngsters in YMCA program

Dear Parents/Guardians:

We are writing to provide you with additional information. We have been advised this evening by the Department of Health and Human Services to share the following information with you. If your child was in the Chester Academy YMCA after school program on Monday or Tuesday of this week, there is a possibility that they came in contact with an individual who has had contact with someone confirmed to have COVID-19. The YMCA has also been informed of this and they are working with us to notify parents.

If this group includes your child, you should monitor your child's health for the next 14 days. Should the child exhibit symptoms consistent with COVID-19 you should contact your pediatrician or primary care physician for specific direction.

COVID-19 is characterized by mild symptoms including a runny nose, sore throat, cough, and fever. In severe cases patients sometimes have difficulty breathing. You should always contact your health provider if you have concerns.

All questions regarding the impact COVID-19 has on SAU #82 and Chester Academy should be sent to me at lockwoodd@chesteracademy.org. Please do not hesitate to contact me with specific questions or concerns.

Sincerely,

Darrell J. Lockwood

Darrell J. Lockwood, Ed.D.
